October 23d, 1751. [NUMBER 910.]

South-Carolina GAZETTE.

Containing the freshest Advices, Foreign and Domestic.

MADRID, July 6.

THREE English ships have been fitted at Cadiz, by order of the court, to transport troops and ammunition to America. The tranquility of Peru is perfectly restored: Enginiers will soon be sent to repair the fortified places upon the sea coasts of that kingdom; and there is a talk of building at the same time, a fortress in the Island of Juan-Fernandez.

London, July 20. By letters received by the last french mail we have an account, that when the french soldiers plundered the Indians, after their late engagement in the East-Indies, they took from 5 to 10,000 pagadoes each common man; and that some of the officers had 50,000 pagadoes each'——Every pagadoe is worth 7 s. 6 d. sterling.

Mr. Dupliex has sent the French king a present of a diamond, the largest that ever came to Europe.

The Royal Anne, a first rate, now re-building at Woolwich, is esteemed the largest ship ever built in Europe; She is to carry 112 brass guns, and 1100 men, and is 12 feet wider, and 8 feet longer, than the late unfortunate Victory.

London, July 30. Several German families from Saltzburg, Wirtemberg, and other neighbouring places, who are going to settle at Ebenezer in Georgia, at their own expence; arrived last friday in the river from Rotterdam, and will soon embark on board the Antelope, capt. M'Clellan, a large ship taken up for that purpose.

London, August 1. There is a Talk that admiral Hawke will soon have the command of a squadron of men of war.

The several enginiers, &c. will soon embark for our colonies in the West-Indies.

London, August 8. We hear that Admiral Knowles is to be appointed governor of Jamaica, in the room of [illegible] is coming home.

London, August 10. Thirteen French outward-bounder ha ships, full of officers and soldiers, which they pretended was only to repair the losses they had sustained, touch'd at the Cape of Good-Hope in April last.

London, August 13. By accounts from the East-Indies, it seems, Mr. Dupleix has contrived to erect a new power in that country, to balance that of the Mogul, by engaging the sovereign of the Marattes to proclaim himself king of Golconda, and has likewise made a Peace between the new monarch and the Mogul, for which he has so managed as to be well paid on both sides.

By a private letter from Paris we are informed, that the booty made in the camp of the Nabob that was defeated some time ago by the French in India, together with the plunder they got in 2 or 3 places taken by them after the battle, is so great, that the share of Mr. Dupliex alone amounts to no less than 8,000,000 sterling.

London, August 15. Gov. Cornwallis is speedily expected from Nova-Scotia, in order to make a full report of the present state of that infant colony; the difficulties, if there be any, under which is still labouring; and the proper methods for removing them, and making that great barrier of our northern colonies on the continent as strong and as secure as possible. On monday a vessel having on board several Germans and other families, going to Nova-Scotia, fell down the river.

July 29. Since our last we have had a ship from Rotterdam, with between 2 and 300 Dutch [illegible] a ship from England with 100 recruits for [illegible] a regiment [illegible] Just now arrived a ship from Amsterdam, with more Dutch settlers [illegible]

We hear from Halifax, that [illegible] that place, merchant, and Mr. Peck [illegible] are erecting large dwelling [illegible] with timber, &c. [illegible]

gone to Canada, and the rest to Bay Vert, to receive the French king's presents, lately arrived there.—— That major Luttrel, commander of the British troops, had lately sent several parties, and cut down all the dykes on the French side, from whence the Indians used to annoy our shipping; so that there is now not the least danger in going up the river.—— And that the French troops desert daily to our garison.

We likewise hear, that they daily expected a number of families at Chignecto from Halifax, to settle there; and that they are constantly at work on the fort, which in a short time will be so strong, as to defy all the force that can come against it.—— That the place is very healthy, and the people in high spirits, and they hope soon to see a flourishing settlement; especially as they have the greatest reason to believe the Indians are desirous of a peace.

Boston, Sep. 2. We have advice from West-Indies, that there has lately been a violent storm or hurricane at some of the islands, which has done a great deal of damage to the shipping, &c. that at St. Kitt's eight vessels were drove ashore, and three lost at Statia, with all their men. We have not yet learn'd the particulars, or what damage was done at the other Islands.

Thursday last arrived here on board Capt. Sanders, from St. George's, the gentlemen who lately went down on behalf of this government to treat with the Eastern Indians; and we hear they were met by a great number of the Penobscut, Passamaquada and St. John's tribes, who all appeared sincerely desirous to renew and confirm the Peace; but as none of the [illegible] were present the other Indians [illegible] engaged to bring them [illegible] within forty days [illegible] part, if possible, of which arrival [illegible] to this government, when [illegible] be renewed.

[illegible] the 26th [illegible] French frow from Louisbourg, [illegible] of the order of St. Louis, and five of [illegible] gentlemen, with expresses [illegible] the governor [illegible] week they sail'd again [illegible] ago arrived commodore Pye, in his majesty's ship the Gosport of 40 guns, and we daily expect another 40 and a 50 gun ship.

Boston, Sept. 23. From Newfoundland, we have advice, that commodore Rodney (with the Rainbow and Boston men of war) was arrived there from England. The commodore had been in search of an island said (and sworn) to be discovered [by capt. Otton, in the beginning of the year 1749, on his passage home from South-Carolina] in about 50 degrees N. lat. and 300 W. of England; but having cruised thereabouts for 14 days without making any discovery, he returned.

Extract of a Letter from a Gentleman at St. Eustatia, to his Friend at Marblehead, dated July 20. 1751.

IN our passage from the Main to St. Eustatia, on the 26th of June, in lat. 15. and long. 61. about 11 o'clock at night, was struck by a sword-fish on our starboard bow, which run his sword through our outside plank, and a timber of 10 inches thick, and sealing, and into the hold 10 inches, and broke his horn off, and left it in the hold 10 inches, and caused our vessel to have 4 feet 2 inches water in the hold, but by our 2 pumps cleared her. We reckon that the horn went thro' 14 inches and half solid oak.
